GARROS-SE

精湛的工艺

Excellent workmanship

04

GARROS-SE

台板、压轮、前导纸板 Platen/Pinch Roller/ Media Guide

高精度台板，保证画面的细腻；密排压轮，保证步进的稳定；温度可控的前导纸板，满足画面烘干的需求；

High Precision platen, ensure the printing exquisite. Intensive pressure roller, makes the media forward precisely. Media guide temperature changeable, can make the printing dry faster.

直线导轨 Linear Guideway

采用进口高品质静音导轨，保证喷头架运动的平稳性和持久性，确保打印机长时间正常工作。

Use the import high quality mute linear guideway, guarantee a stable and enduring carriage condition, ensure the long time printing.

精湛的工艺

Excellent workmanship

07

GARROS-SE

喷头架系统

P/H Carriage

精心研制独创式结构，精密模具，合金材质打造。拥有1.5mm, 2mm, 2.5mm, 3mm, 4mm 5档喷头高度可调，使各种厚度的材质都能表现出最佳的画面效果。

With special structure, it's made from alloy by precision mould. With 5 adjustable heights (1.5mm, 2mm, 2.5mm, 3mm and 4mm), can meet with different media printing request and get the best printing effect.

墨栈系统

Capping Station

精密模具，合金材质打造，让清洗更简单、方便；

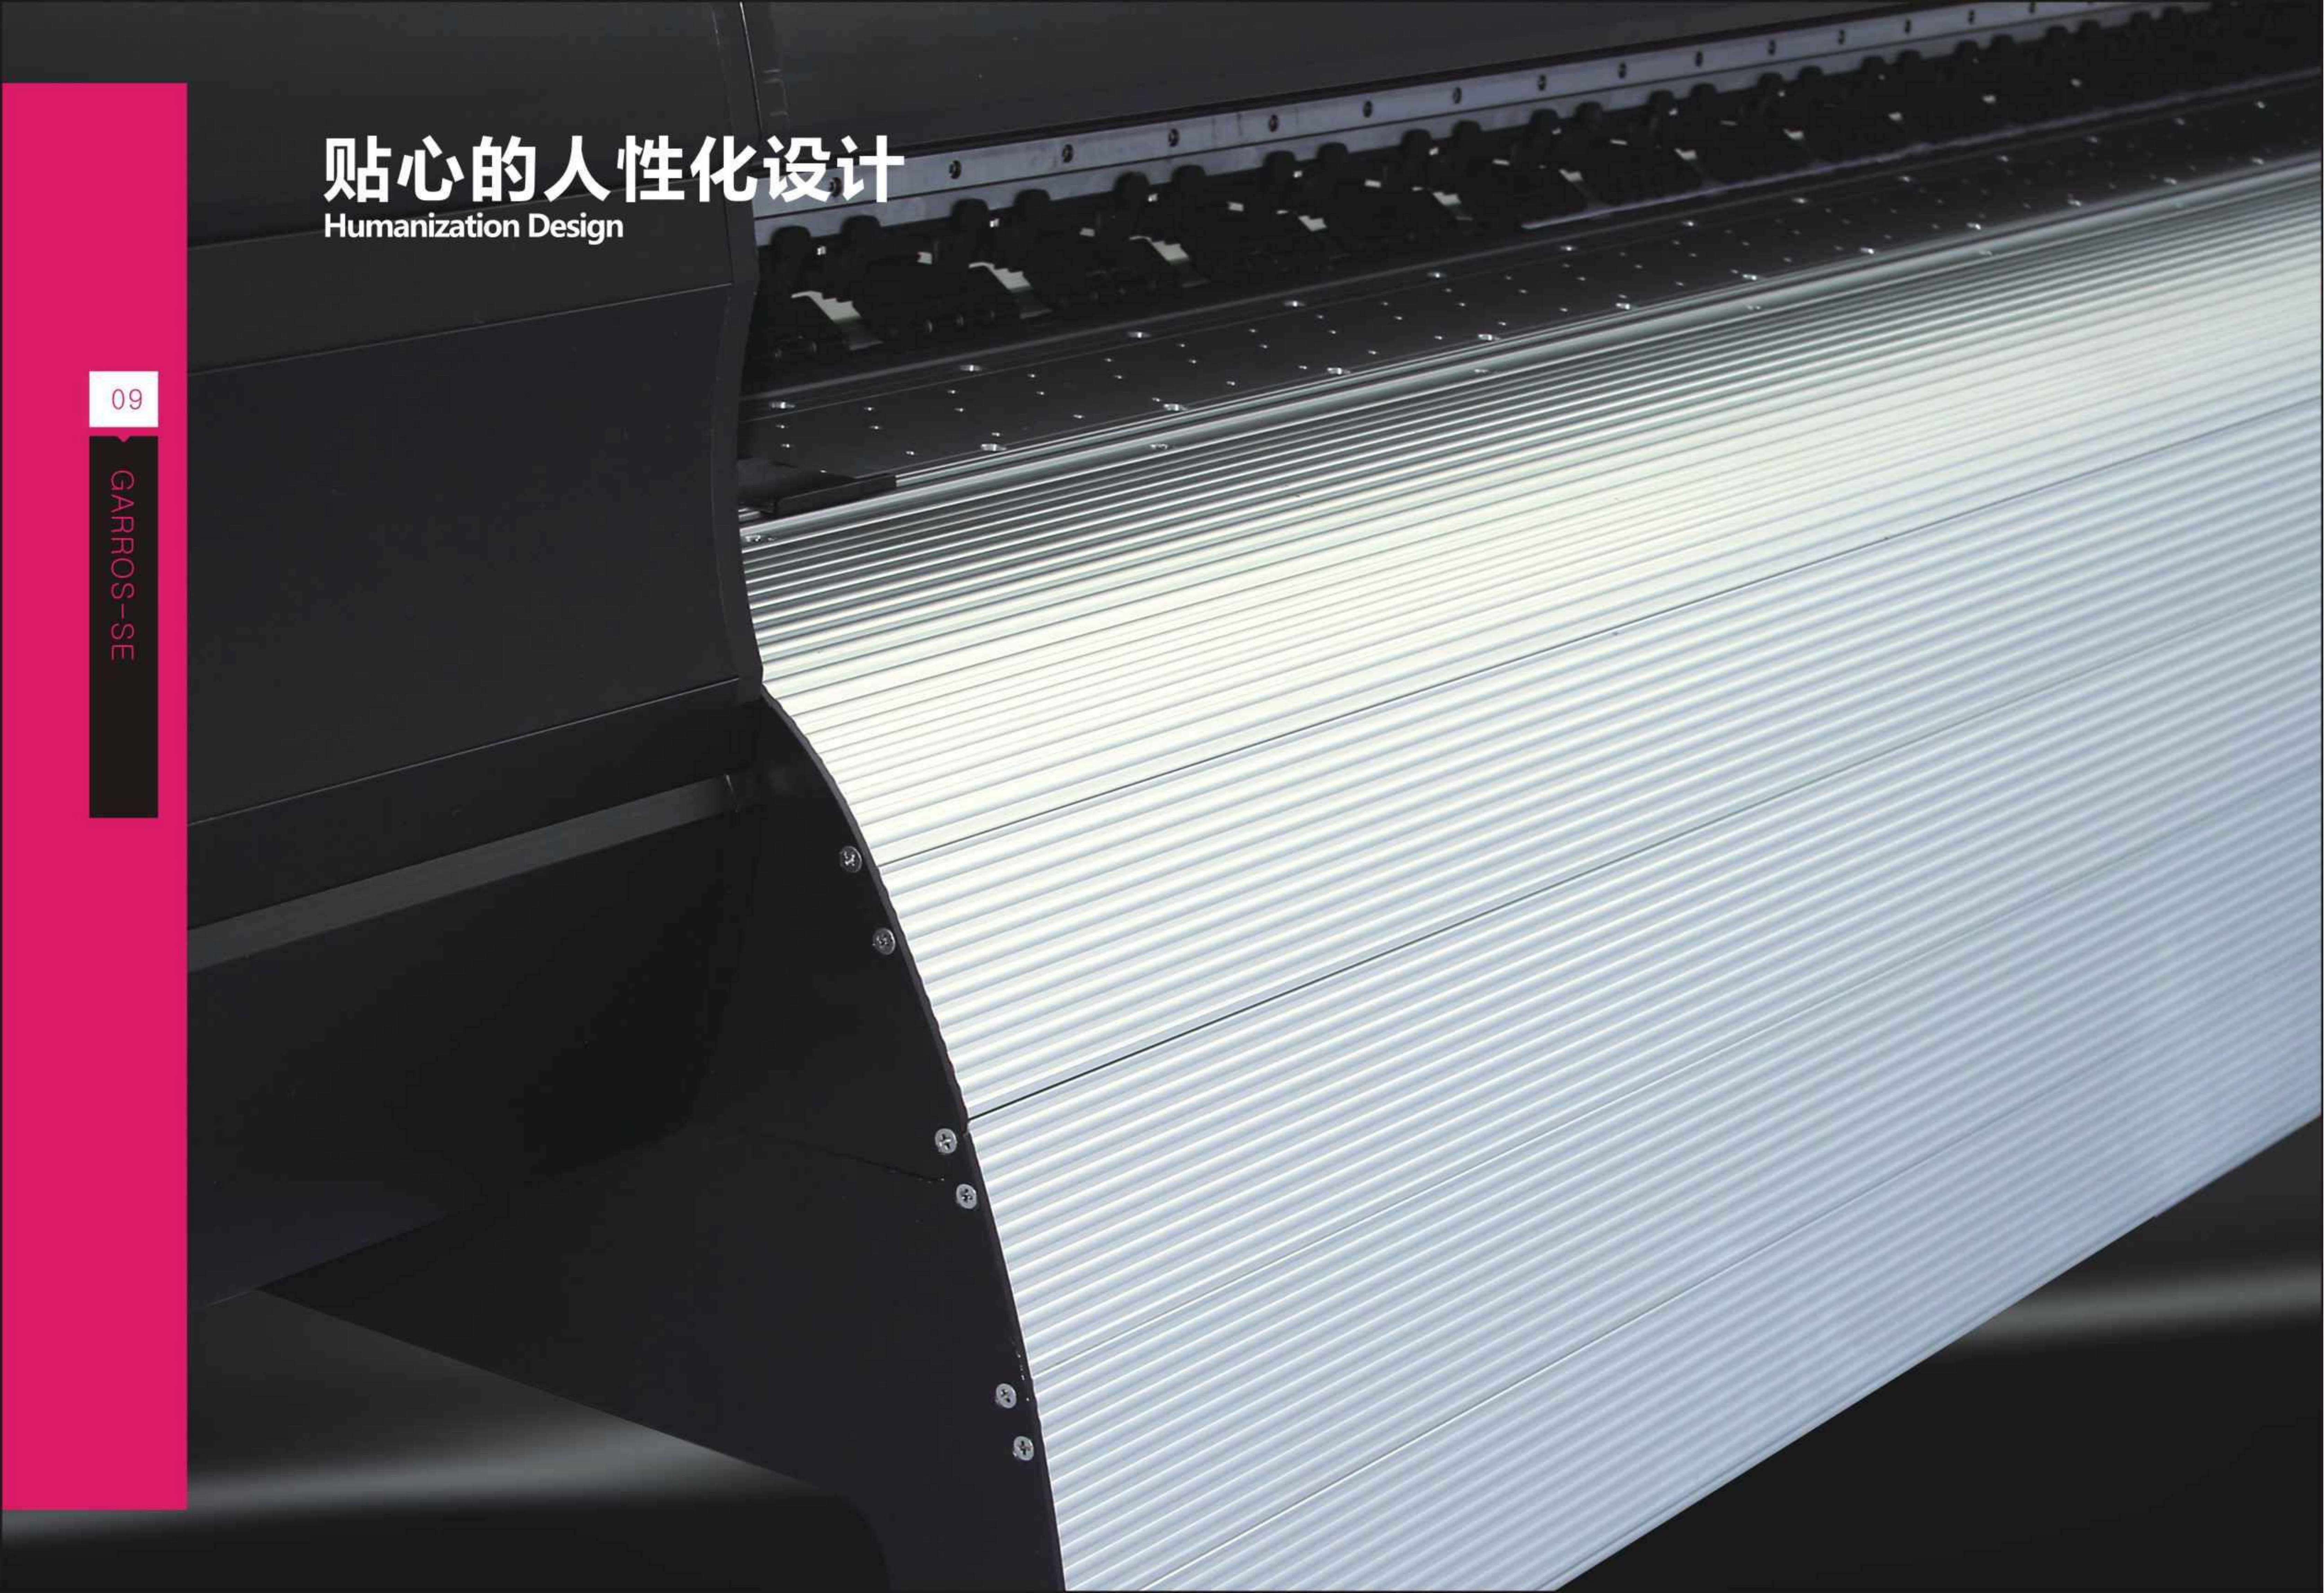

It's made from alloy by precision mould, and it can clean the head very well.

贴心的人性化设计

Humanization Design

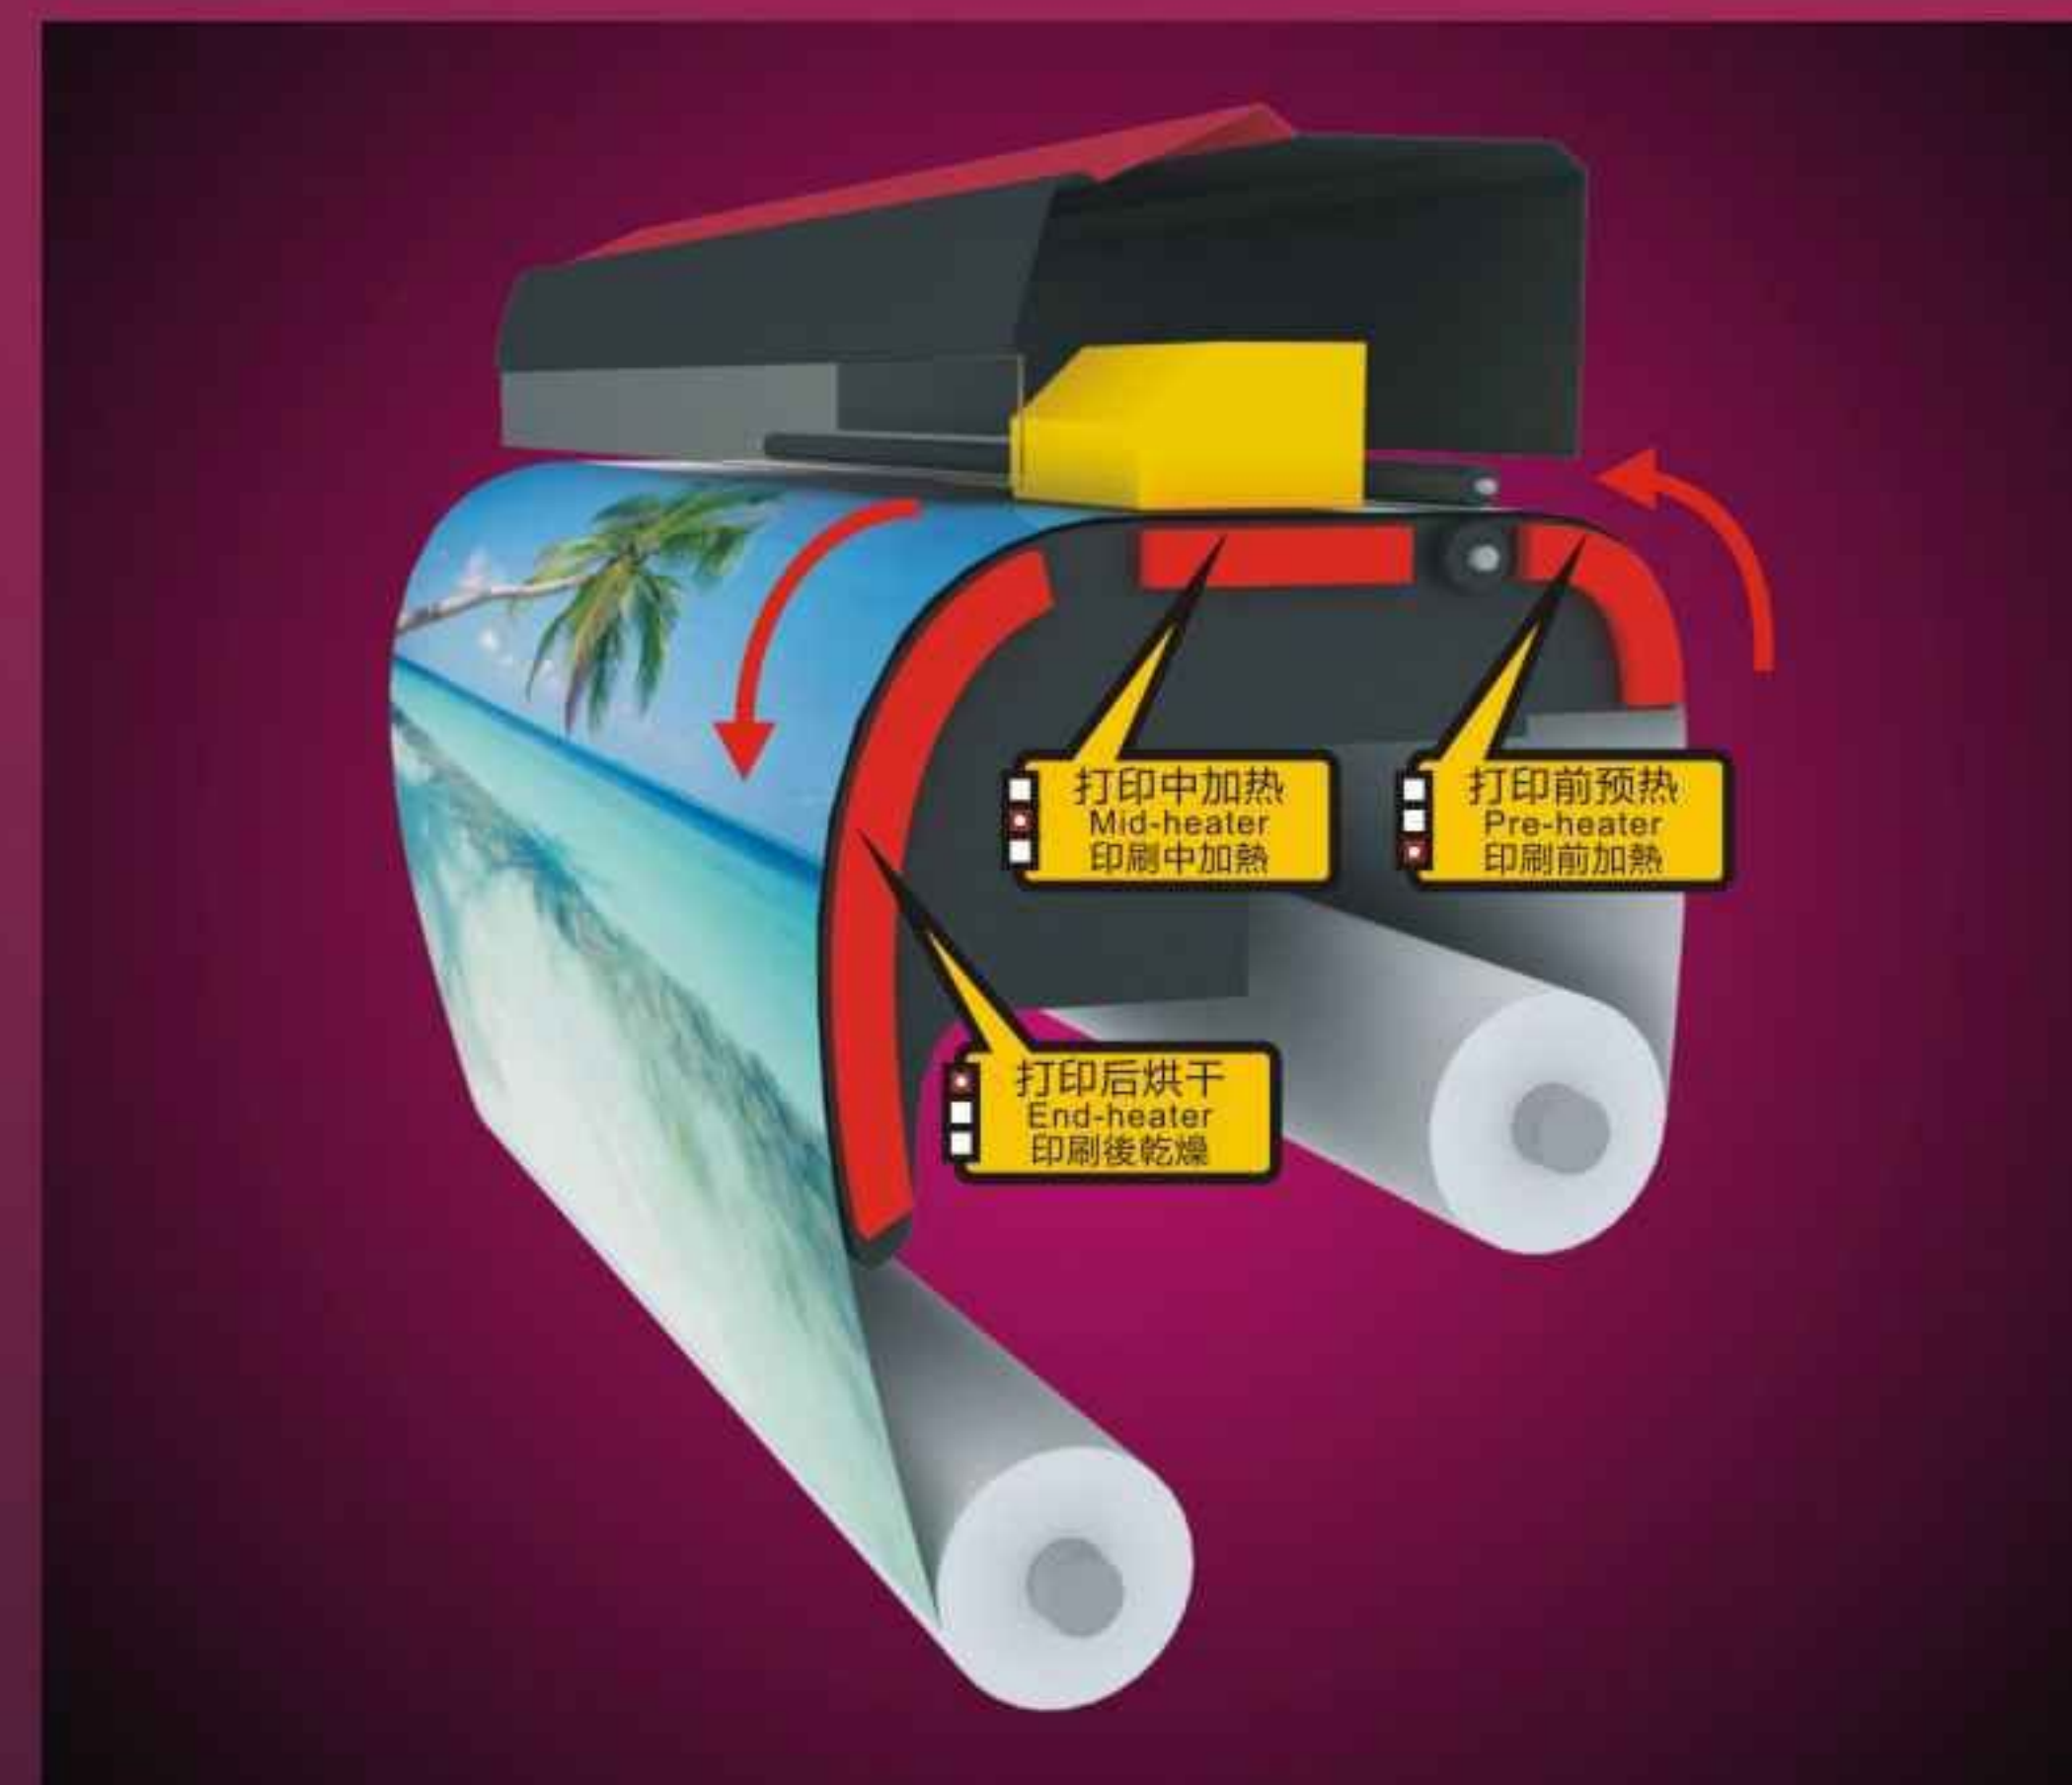

09

GARROS-SE

内置前中后三段加热，让墨水的吸收更好，颜色更鲜艳，画面更细腻；
Standard configuration of pre-heater, mid-heater and end-heater, makes the ink absorption better, the color more bright and the printing more delicate.

独有的BH-3型超大背烘干系统，完美呈现400X1600mm独立可控加热平台，使墨水快速干燥，保证了高速输出的质量。
The unique big BH-3 drying system, with 400 x 1600mm independent and controllable heating platform, makes the ink dry quicker and ensure the quality of fast speed output.

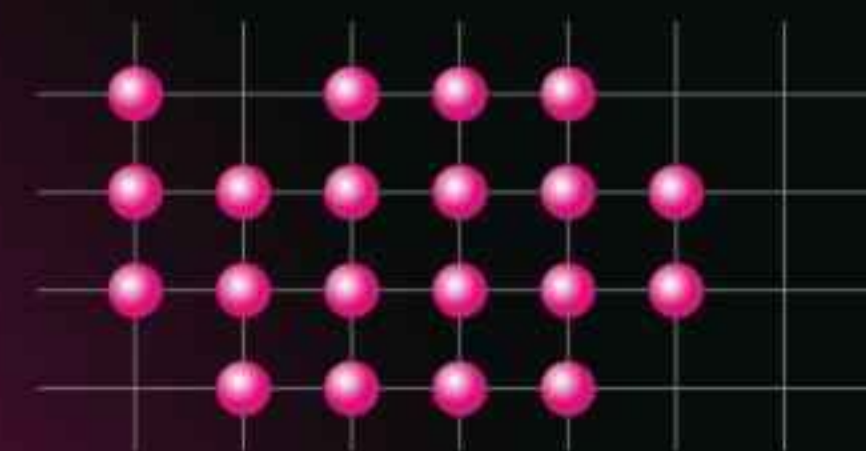

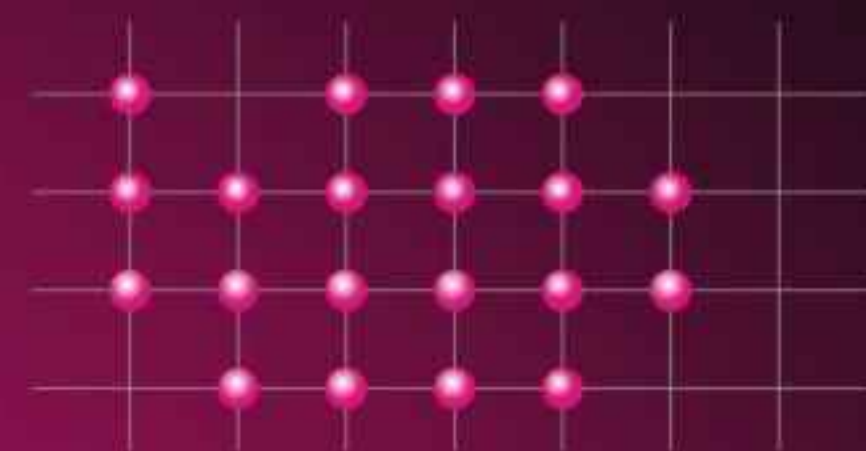

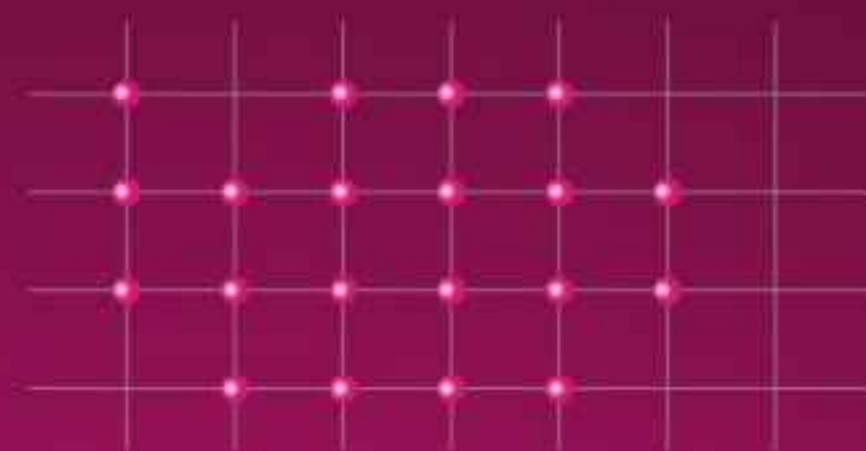

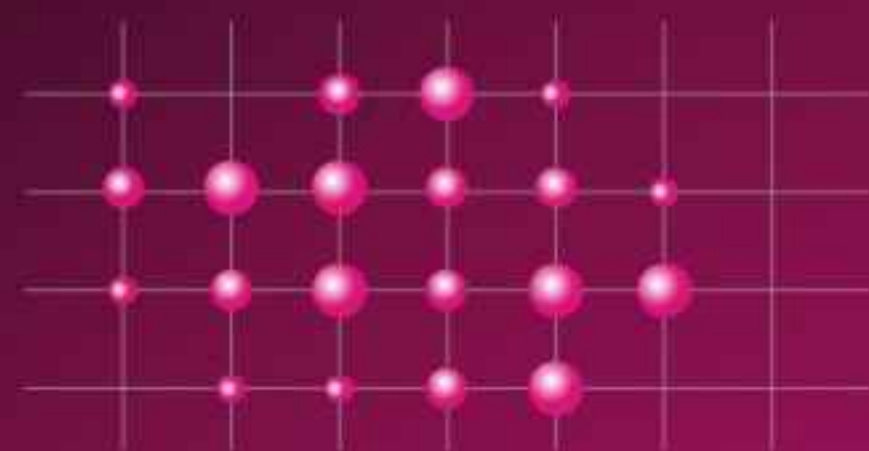

智能的控制系统

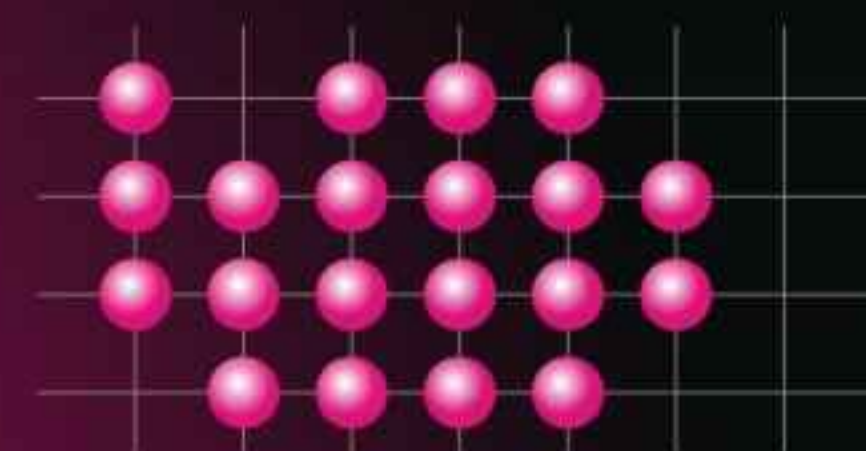

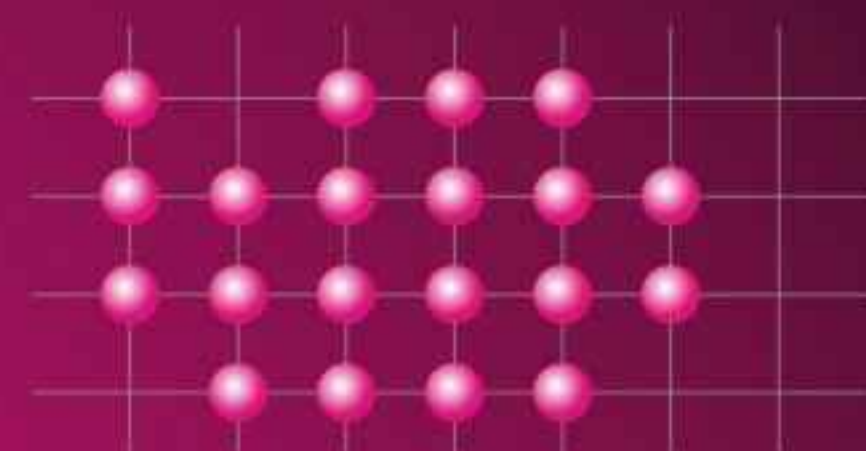

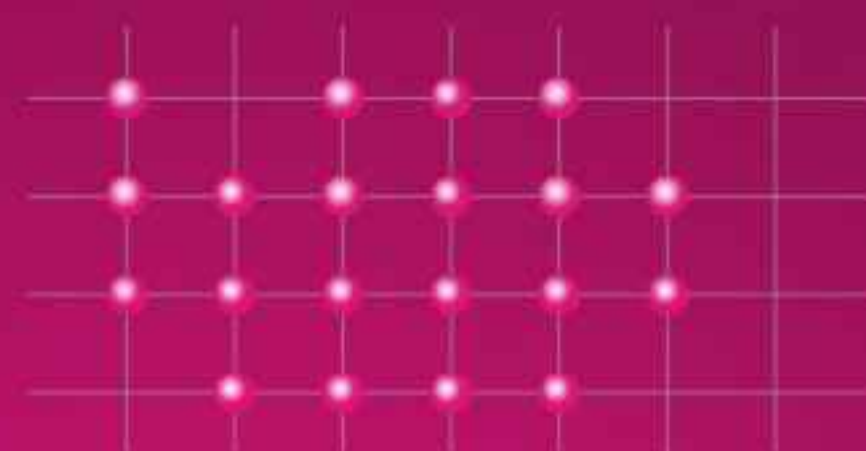

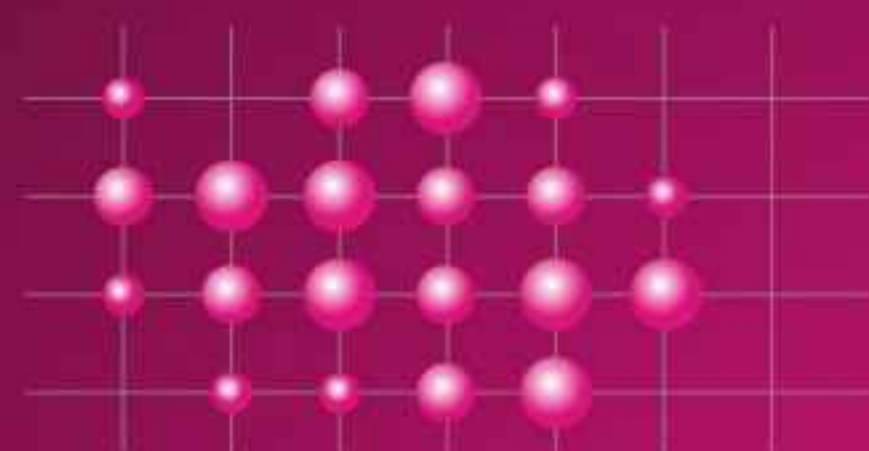

Intelligent Control System

八种墨滴控制系统
Eight kinds of ink dot control system

A

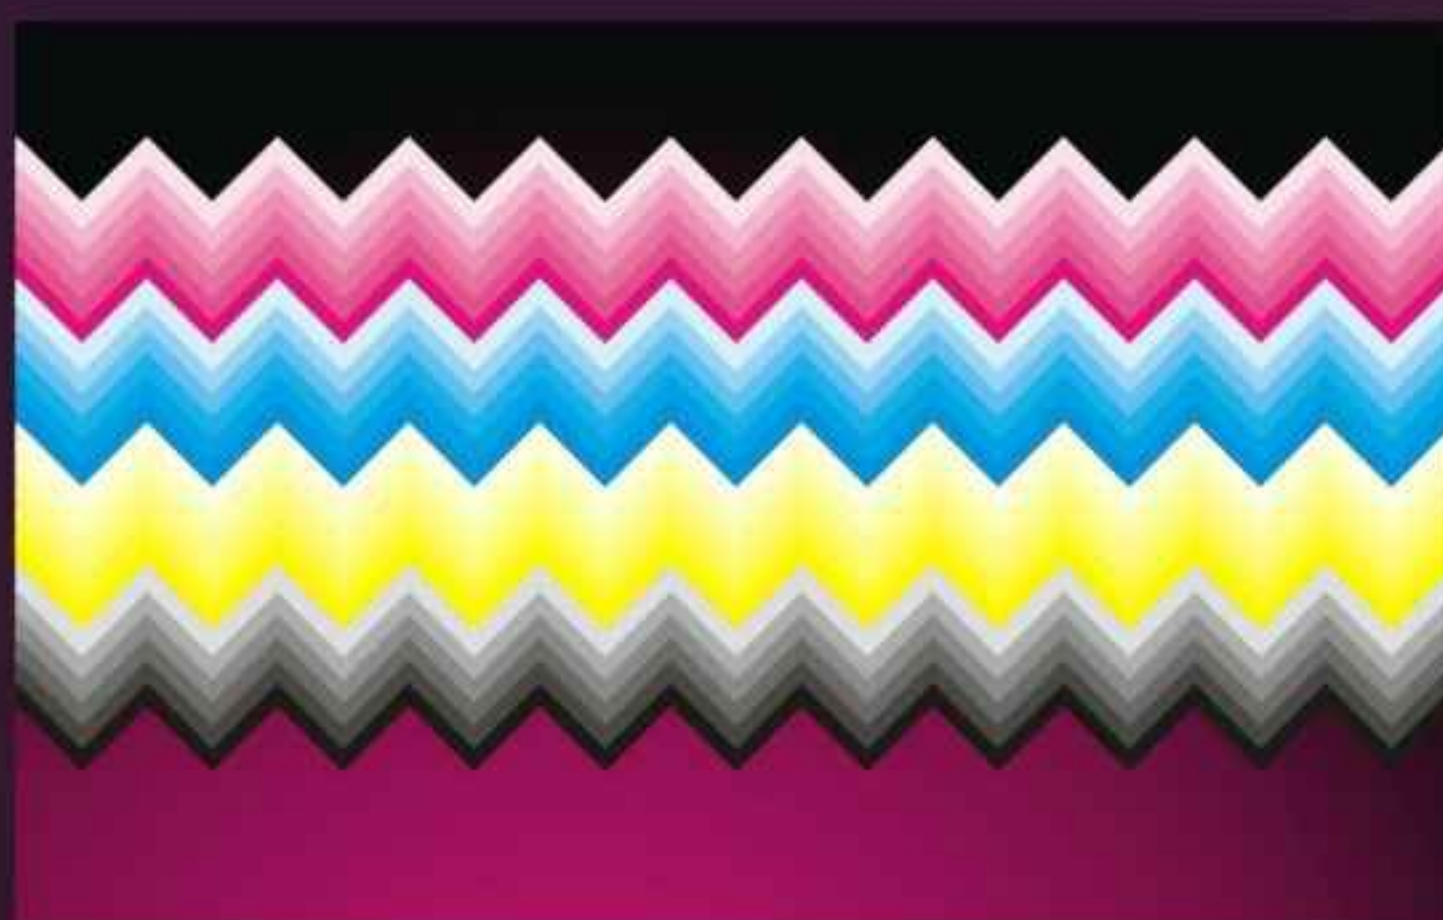

B

拥有两组不同的可变点墨滴技术及多种固定墨滴组合可供选择，能更好的适应不同种类墨水及介质的特点。

With two variable ink dot technologys and have several fixed ink drop combinations available, can suitable for different inks and materials better.

波浪、羽化功能 Wave/Feather Printing Function

采用先进的波浪、羽化功能，提升打印品质，降低因墨水或喷头原因给打印带来的影响；

With advanced wave & feather printing technology, improving printing quality, reduce the effect by ink or print head.

每小时15平方的画面输出 15 m²/h Printing Output

高品质的画面输出，4pass模式下，最快可实现每小时15平方的高速输出。

High quality printing output, under 4 pass mode, most quickly speed is 15 m²/h

色界SE系列写真机配置参数表

ADDTOP-SE Series Printer Configuration Parameter Chart

打印机型号 Printer Model		SE 1601
基础参数 Basic Parameter	打印技术 Print Technology	微压电智能墨滴可变技术 Drop-On Demand Piezo Intelligent Variable dot Drive Method
	打印方向 Print Direction	单向打印\双向打印 Unidirectional/Bidirectional
	打印头数量 Number of Print Head	1个 1 head
	喷头数 Number of Nozzles	180x8x1
	颜色模式 Color Mode	双4色或8色 Double 4-color or 8-color
打印速度 Print Speed	喷头高度 Head Height	1.5mm / 2.0mm / 2.5mm / 3.0mm / 4.0mm
	最大介质宽度 Maximum Media Width	1680mm
	最大打印宽度 Maximum Printing Width	1620mm
	打印分辨率 Printing Resolution	360DPI / 720DPI / 1080DPI / 1440DPI
		4pass 6pass 8pass
墨水 Ink	种类 Kind	水性染料，弱溶剂ECO墨水，热升华墨水 Water Base Dye Ink, Eco-solvent Ink, Sublimation Ink
	墨盒数 Number of Cartridge	220 ml X 8 pcs
	最大厚度 Maximum Thickness	2mm
	介质类型 Media Type	PP合成纸,高光相纸,灯片,车身贴,灯布等 PP Paper, Photo Paper, Backlit Film, Self Adehesive Vinyl, Flex Banner ect
	收放卷方式 Media Release Way	被动式放纸F6 Passive Feeding System F6，自动收纸器K7 Automatic Take Up System K7
介质规格 Media Size	最大介质重量 Max Load	35kgs(更重的材质可选配其他型号收放卷系统 Other feeding&take up system available for heavier media)
	最大介质直径 Max Diameter	350mm
	打印前-预加热器 Pre-heater	常温~60℃ 恒温可控 Normal temperature~60℃ constant temperature controllable
	打印中-打印加热器 Mid-heater	常温~60℃ 恒温可控 Normal temperature~60℃ constant temperature controllable
	打印后-画面加热器 End-heater	30℃~50℃
介质加热系统 Media Heater System	画面烘干系统 Media Drying System	BH-3超大型背烘干系统（选配）The super big BH-3 drying system（optional）
	最佳工作环境 Operating Environment	温度 Temperature /湿度 Humidity 18℃~28℃ / 40%~60%
	通讯接口 Interface	USB2.0
	操作系统 Operating System	Windows XP / Windows7
	RIP软件 RIP Software	MainTop / Photoprint
设备外形尺寸（长×宽×高） Printer Dimensions(L*W*H)	电源规格 Power Rate	AC220V±10%/50Hz，最大(maximum)10A
	重量 Weight	2560 X 650 X 1250mm 150kgs
